Headteacher Richard Gilpin

7th February 2020

Dear Parents/Carers

As part of our aim to continue to challenge and inspire our students in English, we have put together a menu of creative 'Super Learning' tasks that we hope your child will enjoy completing. We hope that it will encourage pupils to further embrace their learning and be willing to work beyond the classroom to create some wonderful pieces of independent work. We hope this will help them to engage in additional research at home and to support what they have learnt in class in order to stimulate curiosity and inspire themselves and others. Our belief is that our super learning tasks will encourage students to leave school with a lifelong love of learning that they will be able to take in to the workplace and beyond.

Our hope is that students will experience:

- S** – Stimulation of ideas
- U** – Unwrap the unusual
- P** – Pride in what can be created through puzzling concepts
- E** – Enrich and extend their ideas
- R** – Read more widely

This is a pilot project and these tasks are all voluntary and extra to what students do for homework and in the classroom. All tasks need to be completed by 20th May 2020. Students can present their work in any way and when their task is complete their English teacher will stamp each section of their task card. Students will be rewarded in a special honors celebration and displays on the department honors board as well as letters home.

We are already excited about what our students could create.

Yours faithfully,

Mrs L Davies
Head of English and Film Studies
